

Long Term Storage

Our Patented and Secure Storage Solution

Challenge

Do you experience rapid changes in design and materials? Perhaps also shorter product life cycles and new products reaching the market faster and faster? One of the key challenges is ensuring the availability of parts for older products. Traditional storage methods, especially those exceeding 4-5 years, can lead to oxidation and corrosion, impacting the quality and reliability of your components. Even shorter storage periods can result in significantly higher failure rates.

Emporium Partners Solution

At Emporium Partners, we are specialists for Long Term Storage of electronic components and our services are designed to support you and meet your individual needs. We have a certified process coupled with patented technology to store your valuable and critical components in a secure and controlled environment, guaranteeing against corrosion, oxidation, and other types of degradation. We offer to distribute your goods wherever they are needed for production. In the meantime, you will have full visibility of the goods stored. In short, we manage and store your components as well as sell and distribute them if required.

-  **Obsolete & Hard-to-Find Components**
-  **Component Lab**
-  **Excess Inventory Management**
-  **Export Compliance**
-  **BOM Analysis**
-  **Cost Savings**
-  **Long Term Storage**
-  **Logistics & Inventory Management**

Long Term Storage

Our Patented and Secure Storage Solution

A Unique and Patented Solution

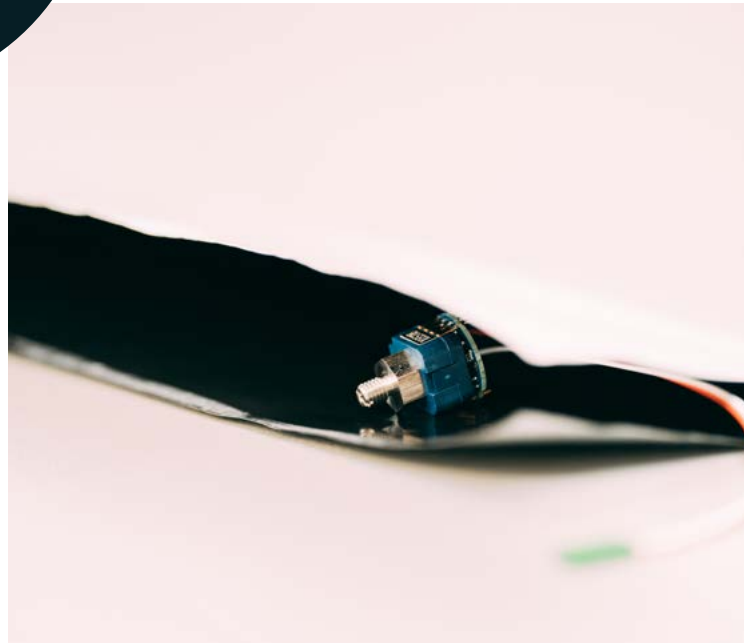

With our unique solution we significantly reduce the aging processes of your components. Using a patented technology by Intercept Technology, our specialized conservation method enables you to store all kind of components for 25 years or even longer. It is a measurable solution, that is insured by Emporium Partners and Intercept Technology. With our Long Term Storage solution, you can confidently commit to long-term contracts with your customers, ensuring product availability for many years to come.

Ongoing Quality Control

Quality is a top priority in every aspect of our Long-Term Storage solution. We implement continuous quality controls to meet and exceed client expectations, ensuring optimal storage conditions throughout the entire period. We maintain a robust monitoring system across all our storage facilities to guarantee these conditions are consistently met. As part of our comprehensive service, we also handle the picking and preparation of parts for production, ensuring components are free from humidity and comply with JEDEC standards for quality and reliability.

Long Term Storage Process

Our Long Term Storage process includes detailed documentation of all incoming goods, inspections and testing, product energizing, inventory control and reporting as well as logistics solutions.
